

KINARD KHIN MASAYON ORBITA

Senior System Administrator Staff | Web Application Developer

Panabo City, PH | 09267259851 | kinardkhin@gmail.com | [linkedin.com/in/kinardkhinorbita](https://www.linkedin.com/in/kinardkhinorbita) | kinardforge.org

PROFESSIONAL SUMMARY

Senior System Administrator Staff and Web Application Developer with 7+ years of experience building, deploying, and maintaining production web applications for port terminal operations. Proficient in Laravel, React, Vue.js, Node.js, and Supabase, with hands-on experience in Navis N4 EDI integration, network monitoring, Active Directory management, and containerized deployments via Docker. Adept at leveraging AI-assisted development workflows using Claude, GitHub Copilot, and Bolt.new to deliver scalable, maintainable internal systems.

PROFESSIONAL EXPERIENCE

Senior System Administrator Staff

2018 to Present

Davao International Container Terminal, Inc. - Panabo City, Davao del Norte, Philippines

- Build and maintain multiple production web applications used daily by port terminal staff, covering driver monitoring, vessel operations, reefer tracking, gate inspection, and automated reporting
- Design and develop in-house web applications using Laravel, React, Vue.js, InertiaJs, Node.js, Supabase, and MySQL across multiple internal systems
- Handle EDI generation and interpretation for Navis N4 including COARRI, CODECO, TPFREP, and COREOR message types for container terminal operations
- Manage Active Directory user accounts via LDAP including user creation, password resets, and access control on Windows Server
- Monitor and maintain network devices including access points, routers, and switches through a custom-built internal network monitoring system
- Build and maintain automated reporting pipelines using PHP cron jobs that send vessel and operational reports via Telegram as image attachments on a scheduled basis
- Administer Jotform-based online forms for customer Job Orders and Pre-Advise Containers, including customer training and daily form updates
- Manage source control and deployment pipelines using GitHub and Netlify, and utilize Docker for containerized application development and deployment
- Apply AI-assisted development tools including Claude, GitHub Copilot, ChatGPT, and Bolt.new to accelerate application delivery and code quality

KEY PROJECTS DEVELOPED

DICT Portal (Production) | *Laravel 13, Inertia.js, React 19, TypeScript, MySQL, SQL Server, Microsoft Entra ID SSO, Docker*

- Unified four standalone operational tools into one authenticated platform, migrating from legacy LDAP to Microsoft Entra ID SSO with a safe rollback path to keep live displays online during cutover
- Runs unattended on wall-mounted terminal displays with auto-refresh and fullscreen handling; superadmin manages pre-provisioned access centrally

DICT Operations Suite (Production) | *Laravel 13, React 19, TypeScript, Inertia.js, MySQL, SQL Server (Navis N4), Docker*

- Multi-module reporting platform reading live from Navis SPARCS N4, replacing ad-hoc SQL queries with a permission-gated surface covering reefer tracking, road queue boards, vessel scheduling, and container yard status
- Gave road queue TV boards a historical record for the first time — shift TAT averages and high-elapsed-transaction tracking that previously vanished on every board refresh

Container Monitoring System - DICT-BOC API Bridge (Production) | *Laravel 13, React 19, TypeScript, Inertia.js, MySQL, SQL Server (SPARCS N4), JWT, Docker*

- Automated compliance-critical customs reporting to the Bureau of Customs, replacing a fully manual process with batched SPARCS N4 data extraction, transformation, and transmission
- Every transmission is auditable down to the individual record with a downloadable JSON payload; daily scheduler sends automatically with an email report for accountability

Fuel Dispensing Management System (Production) | *Laravel 10, Nuxt 3 (Vue 3), MySQL, JWT, LDAP, Chart.js*

- Tracks fuel consumption across trucks, port equipment (RTGs, forklifts), and service vehicles with equipment-specific validation rules and a live Chart.js dashboard for supervisors
- Replaced manual spreadsheet reconciliation with Excel bulk import carrying an auditable upload history per shift

NetDevMon - Network Device Monitoring System (Production) | *Laravel 10, Inertia.js, React 18, MySQL, Windows Task Scheduler*

- Monitors network devices via real ICMP checks on a scheduled pipeline, automatically opening a support ticket when sustained packet loss is detected rather than waiting for someone to notice an outage
- Every device state change is captured in an audit log, giving admins a traceable record without checking each device by hand

M&S Borrower - Materials and Supply Borrower System (Production) | *Laravel 10, Inertia.js, React 19, MySQL, DomPDF*

- Replaced paper-based equipment borrowing with a digital system covering proof file attachments, role-based access, and a full audit log of every transaction and login
- Filterable reports export as PDF or CSV for periodic audits; soft deletes keep historical records intact and attributable after staff removal

Driver Accomplishment Monitoring System (AI Assisted) | *React 18, TypeScript, Supabase, Azure AD SSO, Tailwind CSS, Netlify*

- Role-based app for 9+ staff roles tracking driver accomplishments, truck assignments, and live login status via 60-second heartbeat — replacing manual radio-based checks for terminal operations
- Supabase Row Level Security enforces access control at the database level; Azure AD SSO is primary auth with a local fallback behind RLS for accounts outside the directory

TECHNICAL SKILLS

Frontend

React.js, Vue.js, InertiaJs, JavaScript, HTML, CSS, Tailwind CSS

Backend

Laravel, Node.js, PHP

Database

MySQL, PostgreSQL, Supabase, SQL

Infrastructure & Tools

GitHub, Netlify, Docker, Windows Server, Active Directory (LDAP), Navis N4 (EDI), Jotform

AI Development Tools

Claude (Anthropic), GitHub Copilot, ChatGPT, Bolt.new

CERTIFICATIONS

- CompTIA Security+
- Microsoft Azure Fundamentals (AZ-900)
- Microsoft Security, Compliance, and Identity Fundamentals (SC-900)

EDUCATION

Bachelor of Science in Information Technology

2014 to 2018

Davao del Norte State College - Panabo City, Davao del Norte, Philippines
